

RoHS Declaration of Compliance

June 2016

METAL RAVNE declare:

- that we do not deliver materials or parts made of or contaminated with any of the restricted substances as stated in these EU-Directives after the above dates of implementation,
- conformity with the Directive 2011/65/EU of the European Parliament and Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment and Commission Delegated Directive (EU) 2015/863 of 31 March 2015 Amending Annex II to Directive 2011/65/EU

Annex II: Restricted substances referred to in Article 4(1) and maximum concentration values tolerated by weight in homogeneous materials

Cadmium (0,01%); Mercury (0,1%); Lead (0,1%); Hexavalent Chromium (0,1%); Polybrominated Biphenyls (0,1%); Polybrominated Diphenyl Ethers (0,1%), Bis(2-ethylhexyl) phthalate (DEHP) (0,1 %), Butyl benzyl phthalate (BBP) (0,1 %), Dibutyl phthalate (DBP) (0,1 %), Diisobutyl phthalate (DIBP) (0,1 %).

Checking the Radioactivity for Shipments of Steel Scrap

June 2016

- Products made at Metal Ravne are free of radioactive contamination.
- The company is carrying out measurement of radioactivity on scrap in accordance with regulations of the government of the Republic of Slovenia, a Regulation on Inspection of **Radioactivity for Metal Scrap Shipments** (Official Gazette of the Republic of Slovenia, No.84/07). Every scrap shipment (wagon, truck) is examined by a radioactivity measuring instrument. The boundary value is 50% over the background, i.e. natural radiation. Measurements are carried out by a person who is licensed to perform monitoring and this license is issued by the Agency for Nuclear Safety of the Republic of Slovenia. A protocol is made for each measurement which is kept in company's records for 3 years. The common ambient level of radioactivity in the town of Slovenj Gradec (about 10 km from the town Ravne) is about 140nSV/h (On line monitoring in Slovenia, <http://www.ursjv.gov.si//si/monitoring/>).
